1. INTRODUCTION

This issue of Economic and Social Indicators presents the Consumer Price Index (CPI) for the third quarter 2020. The methodology used for computing the CPI and the inflation rate is given in the technical note at Annex.

2. KEY POINTS

2.1 The overall CPI

The Consumer Price Index, which stood at 105.2 in June 2020, registered a net increase of 0.8 point (or 0.8%) to reach 106.0 in September 2020 (Table 1a).

On a monthly basis, the CPI decreased by 0.3 point in July and then increased by 0.4 point in August and 0.7 point in September.

2.2 Overview of CPI movements

The main contributors to the net increase of 0.8 point in the CPI from June to September 2020 (Table 2) were:

(a) higher prices of fruits (+0.1 point), soft drinks (+0.1 point), concentrated juice and syrup (+0.1 point), fish (+0.1 point) and other food products (+0.1 point);
(b) higher prices of cigarettes (+0.1 point), motor vehicles (+0.2 point), prepared foods (+0.1 point) and some other goods and services (+0.4 point); partly offset by
(c) lower prices of vegetables (-0.1 point), culinary herbs (-0.1 point) and ginger (-0.1 point); and
(d) lower interest rates on housing loan (-0.2 point).

3. MOVEMENT OF CPI SUB-INDICES

Percentage change in CPI sub-indices from June to September 2020

![Graph showing percentage change in CPI sub-indices](image-url)
The changes in the sub-indices (Table 3) for the twelve divisions of consumption expenditure from June to September 2020 were as follows:

<table>
<thead>
<tr>
<th>Division of consumption expenditure</th>
<th>Main contributors to change</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Food and non-alcoholic beverages (+0.9%)</strong></td>
<td>Higher prices of fruits (+8.2%), soft drinks (+12.8%), concentrated juice and syrups (+17.3%), fish (+1.9%) and powdered milk (+1.7%) partly offset by lower prices of vegetables (-2.0%), culinary herbs (-23.2%), ginger (-33.9%) and traders’ rice (-2.6%).</td>
</tr>
<tr>
<td><strong>Alcoholic beverages and tobacco (+0.8%)</strong></td>
<td>Higher prices of cigarettes (+1.3%), wine (+4.8%) and whisky (+1.5%).</td>
</tr>
<tr>
<td><strong>Clothing and footwear (+0.5%)</strong></td>
<td>Higher prices of footwear (+2.2%).</td>
</tr>
<tr>
<td><strong>Housing, water, electricity, gas and other fuels (-2.2%)</strong></td>
<td>Lower interest rates on housing loan (-8.5%) and lower prices of cooking gas (-2.2%).</td>
</tr>
<tr>
<td><strong>Furnishings, household equipment and routine household maintenance (+1.3%)</strong></td>
<td>Higher prices of some other non-durable supplies (+4.4%), some major household appliances (+1.4%) and washing materials and softeners (+1.0%).</td>
</tr>
<tr>
<td><strong>Health (+1.6%)</strong></td>
<td>Higher clinic fees (+2.8%), higher prices of some medicinal products (+2.0%) and spectacles (+6.3%).</td>
</tr>
<tr>
<td><strong>Transport (+1.5%)</strong></td>
<td>Higher prices of motor vehicles (+2.9%), spare parts and accessories (+7.4%) and other transport services (+20.0%).</td>
</tr>
<tr>
<td><strong>Communication</strong></td>
<td>Unchanged.</td>
</tr>
<tr>
<td><strong>Recreation and culture (+0.7%)</strong></td>
<td>Higher prices of audio visual equipment (+4.6%) and stationery (+3.6%).</td>
</tr>
<tr>
<td><strong>Education (+1.0%)</strong></td>
<td>Higher university fees in private institutions (+1.8%).</td>
</tr>
<tr>
<td><strong>Restaurants and hotels (+2.1%)</strong></td>
<td>Higher prices of some prepared food (+1.8%), soft drinks in restaurant (+8.1%), cakes and snacks (+3.4%) and higher charges in bars and restaurants (+1.1%).</td>
</tr>
<tr>
<td><strong>Miscellaneous goods and services (+1.6%)</strong></td>
<td>Higher prices of motor vehicle insurance (+4.5%), jewellery (+13.9%) and goods for personal care (+0.5%).</td>
</tr>
</tbody>
</table>
4. INFLATION RATE

The headline inflation rate was 0.5% for year 2019 compared to 3.2% for year 2018 (Table 5). On the basis of trends in previous years and recent price changes, the headline inflation rate for calendar year 2020 is forecasted at around 2.8%, compared to 0.5% in 2019.

The headline inflation rate excluding 'Alcoholic beverages and tobacco' was 0.4% for year 2019 compared to 3.1% for year 2018.

The headline inflation rate for the twelve months ending September 2020 works out to 1.9%, compared to 0.9% for the twelve months ending September 2019.

The headline inflation rate excluding “Alcoholic beverages and tobacco” for the twelve months ending September 2020 works out to 2.0% compared to 1.0% for the twelve months ending September 2019.

5. INTERNATIONAL COMPARISON OF INFLATION RATE

The table below compares the inflation rate (as measured by the percentage change in the average CPI for a given year relative to the previous year) of Mauritius with those of our main importing countries and some countries in the region for the year 2019.

<table>
<thead>
<tr>
<th>Country</th>
<th>Inflation rate (%)</th>
<th>Country</th>
<th>Inflation rate (%)</th>
</tr>
</thead>
<tbody>

*Forecast*
Technical note

1. Methodology used for the computation of the Consumer Price Index
(Base period: January - December 2017 = 100)

(a) Definition
The Consumer Price Index (CPI) is an indicator of changes over time in the general level of prices of goods and services acquired by Mauritian consumers.

(b) Measurement of the CPI
The CPI measures price change by comparing, through time, the cost of a fixed basket of goods and services. As prices vary over time, the total cost of the basket also changes and thus the CPI measures the change in the cost of this basket. It provides a way to compare what this basket costs at a given period relative to a reference or base period.

The cost of the CPI basket is assigned a value of 100 in the base period and the costs in other periods are expressed as percentage changes compared to the base period. For example, if the CPI is 110, this means that there has been an increase of 10% in the cost of the basket since the base year; similarly an index of 90 means a 10% decrease in the cost of the basket.

(c) The CPI basket
The CPI basket is based on the expenditures of private households in a reference period, currently January to December 2017. The composition of the current CPI basket has been derived from the 2017 Household Budget Survey (HBS) data. It has been determined in accordance with latest ILO and SADC recommendations.

The items constituting the basket have been selected on the basis of the importance of household consumption expenditure on them. The basket includes all important items on which consumption expenditure is significant, i.e. accounting for around 0.1% or more of total household consumption expenditure. Each item’s relative importance, which is called the “weight” (usually expressed on a total of 1000), is the expenditure share of the item. Non-consumption items such as income tax, social security contributions, purchase of land, shares and life insurance are excluded.

The commodities in the basket are classified according to the UN COICOP (Classification of Consumption Expenditure according to Purpose) with 12 divisions, 42 groups and 80 classes.
(d) **Price coverage**

The prices used in the CPI calculation are those that any member of the public would have to pay to purchase the specified goods or services. Any taxes on products attached to the goods are included.

Price collection is done on a regular basis. Each month, around 8,000 price quotations are collected in respect of 1,093 item indicators from some 520 outlets selected to be representative of regions across the islands of Mauritius and Rodrigues.

Prices of non-perishable items are collected monthly in the nine geographical districts of the island of Mauritius and in Rodrigues.

Prices of fresh fruits, vegetables, meat and fish are collected on a weekly basis from 9 markets in Port Louis, Rose Hill, Quatre Bornes, Vacoas, Mahebourg, Flacq, Goodlands, Pamplemousses and Port Mathurin.

Information on rent is obtained from a quarterly rent survey of some 100 rented dwellings.

(e) **Formula for computation of the CPI**

The CPI is computed according to the Laspeyres Formula as a weighted average of price relatives of individual items. The weights are fixed and correspond to the base period expenditures. The Laspeyres Index measures the cost of a basket of goods and services at different points in time, relative to the cost of the same basket in the base period.

The formula used for computing the CPI at time \( t \) is

\[
I_t = \frac{\sum W_i \left( \frac{P_{it}}{P_{i0}} \right)}{\sum W_i} \times 100
\]

where,

- \( I_t \) : CPI for period \( t \) with reference to a base period 0
- \( P_{i0} \) : Price of item \( i \) at time 0, i.e. during base period
- \( P_{it} \) : Price of item \( i \) at time \( t \)
- \( W_i \) : Weight of item \( i \)

The base period is January to December 2017, the period during which the latest HBS was conducted.
2. Inflation

(a) Definition of Inflation

Inflation is the percentage change in the level of prices (as measured by the CPI) from one period to another.

(b) Calculating the Inflation Rate

The headline inflation rate in Mauritius, like in many other countries, is calculated by using the annual average method, i.e. by comparing the average level of prices during a twelve-month period with the average level during the corresponding previous twelve-month period. This type of inflation rate is more appropriate for adjusting wages, salaries and pensions to compensate for loss of purchasing power. *All inflation rates presented in this publication relate to the headline inflation.*

Another commonly used method of calculating the inflation rate is the so called ‘year-on-year’ method. The year-on-year inflation rate is calculated as the percentage change in the CPI for a given month with respect to the CPI for the corresponding month of the previous year. It is generally used by central banks for monetary policy decisions. Year-on-year inflation rates are not presented in this publication but can be easily calculated through the available monthly CPI.

Note: More information about the concept, computation and use of the CPI is available online in the publication ‘[HBS 2017 Methodological Report and updated CPI](#)’
